

CIRCUIT 24

LE MANS IN MINIATURE

Leading at this fly-over is the Circuit 24 Ferrari, but daring handling of the Porsche can still produce a winning spurt down the home straight.

THE WORLD'S MOST EXCITING CAR RACING GAME

Circuit 24—Le Mans in miniature—is voted the most thrilling racing game ever played. It offers boys—and their Dads—all the excitement of a real car race in their own home.

The racing cars in Circuit 24 accelerate faster than any other make of model car. Their power-packed engines roar up to scale speeds of 200 m.p.h. The materials used are of the same high quality as for space rockets, e.g. high-tensile molybdenum steel, Stainless 18/8, Delrin high impact Nylon, etc.

GAMAGES, HOLBORN, LONDON, E.C.1. HOLborn 8484

Open Thursdays Until 7 p.m.

No. 8084 Ferrari Competition Car £2.17.6

No. 8010 D.B. Pinard £1.12.6

No. 8016 Go-Kart. Available later.

No. 8052 Ferrari £1.19.6

For real racing thrills, the two cars in each set have been carefully matched for performance and can't steal surrens from each other. Each is a potential winner; it is the skill of the driver which determines the race.

Circuit 24 Track is the quickest to assemble. In just a few minutes it is ready for racing! With Circuit 24 track components, it is possible to make a wide variety of racing circuits.

The knack of control with the super-sensitive hand accelerators is acquired very quickly... then daring handling produces lap speeds to leave the others standing! The reflex actions and the manner of driving are the same as in reality—requiring concentration and skill.

Circuit 24 racing cars can be operated only by suitable Power Units and Accelerators, which we can supply.

CIRCUIT 24 is the fastest car racing game of them all—with exclusive features!

- Tough, easily assembled track
- Cars with unbreakable bodies
- Extremely robust motors
- No brush replacements
- Easy maintenance
- High grade long-life pick-ups
- Suppressed to counter interference with radio and T.V.
- 200 miles per hour scale speed
- Matching track and tyre surfaces for fast get-away
- Operated from A.C. mains (through Circuit 24 Power Unit)

It is estimated that there will be 10,000,000 cars licensed in Britain by 1970
