CONSTRUCTIONS HISTORIQUES

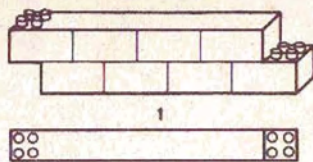

Plans de montage

Nous vous présentons dans les pages suivantes quelques exemples de constructions de châteaux : pour certains nous vous donnons les plans complets de chaque étage, pour d'autres seules figurent les bases sur lesquelles il vous est facile de continuer la construction, mais les différents blocs sont si faciles à assembler que votre imagination vous fera trouver un nombre infini d'autres modèles. Amusez-vous à reproduire les châteaux célèbres que vous connaissez : vous arriverez rapidement à une ressemblance parfaite. Peut-être vous manquera-t-il quelques pierres : procurez-vous les en acquérant des boîtes complémentaires ou des sachets de pièces détachées.

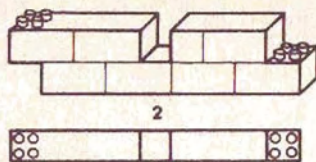

## QUELQUES CONSEILS

Vous trouverez sur la page suivante l'image des différentes pièces de votre jeu et, en dessous, la façon dont elles sont indiquées sur les plans : de plus, les numéros de chaque pierre se retrouvent sur chaque pierre des plans. Commencez vos constructions en allant de la gauche vers la droite, l'étage supérieur de chaque bloc débordant à gauche et l'étage inférieur à droite.
